

Postponed EU ICT Cybersecurity Industrial Strengths and Weaknesses

Dear all,

Over the last few weeks, Squire Patton Boggs and the International Telecommunication Society have been monitoring very closely the coronavirus disease 2019 (COVID-19) global outbreak, recently characterised as a pandemic by the World Health Organization.

In light of the evolving situation around COVID-19 in Belgium, our internal COVID-19 rules and the guidelines set out by the Belgian Authorities (more information is available [online](#)), we have decided to **postpone our event “EU ICT Cybersecurity: Industrial Strengths and Weaknesses”, originally scheduled on 25 March 2020, to a later date in the autumn of 2020.**

We feel that postponing the event is the right precautionary measure to protect the health and safety of our speakers, participants and attendees.

More information on COVID-19 can be found on the websites of the [European Centre for Disease Prevention and Control](#) and the [World Health Organization](#).

We will be in touch shortly with a revised date for our event in autumn.

25 March 2020

9 a.m. – 1 p.m.

Cercle Gaulois

Rue de la Loi 5
1000 Bruxelles
Belgium
